

Risk Assessment and Management Procedure

Approved By CAHURAST Board	Document No. CA/PO/03	Effective From December 2017	Publication Status Public www.cahurast.org
--------------------------------------	---------------------------------	--	---

CAHURAST developed risk assessment and management procedure to identify any risks that hamper the organization and projects effectiveness and design the mitigation methods to the risks identified prioritizing them according to the magnitude of risks.

Risk Assessment

- Risk Identification-Political, Economical, Social, Technological, Environmental and Legal (PESTEL) risks to the project and organization via survey and questionnaires, checklists and focus groups. Further, levels of risks are identified with high, low and medium.

Assessment form template

Type of risks	Who might be in risks	Level of Risks			Remarks
		High	Medium	Low	
Political	√	√	√	
Economical					
Social					
Technological					
Environmental					
Legal					

Risk Management Procedure

- Identify the scope of the project
- Identify the related stakeholders
- Identify internal and external risks
- Identify the actions need to be taken for each identified risks.
